Codebeans Geolocation – Quick Setup Guide

Google Address Autocomplete for Shopify Plus

Overview

Codebeans Geolocation enables Google Address Autocomplete on your Shopify Plus checkout globally. It helps customers add addresses quickly and accurately, reducing checkout time and delivery errors. Codebeans Geolocation works only with Shopify Plus plans.

Install the App

- 1 Go to the Shopify App Store.
- 2 Search for “Codebeans Geolocation”.
- 3 Click Install and follow the prompts.

Step 1: Add Your Google Maps API Key

- 1 Open the Codebeans Geolocation app in your Shopify admin.
- 2 Click the “Add/Edit Google Maps API Key” button on the top-right.
- 3 Paste your Google Maps API key into the field.
- 4 Click Save.

How to Create a Google Maps API Key

A. Create a New Project

- 1 Go to <https://console.cloud.google.com/>
- 2 Click the project dropdown and select “New Project”.
- 3 Enter a Project Name (e.g., “Codebeans Geolocation Autocomplete”).
- 4 Click Create.

B. Enable Billing

Make sure billing is enabled for this project. Google Maps APIs require an active billing account.

C. Enable Required APIs

- 1 In the left menu, go to “APIs & Services” → “Library”.
- 2 Search for and enable “Places API”.
- 3 Search for and enable “Geocoding API”.

D. Create an API Key

- 1 Go to “APIs & Services” → “Credentials”.
- 2 Click “Create Credentials” → “API key”.

E. Secure the API Key

- 1 Click on the newly created API key to edit it.
- 2 Under “Key restrictions”, set the restriction type to IP address (if applicable).
- 3 Add this IP address to restrict usage: 116.202.84.211.
- 4 Click Save.

F. Use the Key in Codebeans Geolocation

Copy the API key and paste it into the Codebeans Geolocation app’s “Add/Edit Google Maps API Key” field, then click Save.

Step 2: Enable Codebeans Geolocation in Shopify Checkout

- 1 In Shopify admin, go to Settings → Checkout.
- 2 Under Configurations, click Customize to open the Checkout Editor.
- 3 In the left sidebar, click the Settings icon.
- 4 Scroll down to the “Address autocomplete” section.
- 5 Check “Use address autocomplete”.
- 6 Select “Codebeans Geolocation” from the provider dropdown.
- 7 Click Save at the top-right.

Codebeans Geolocation Versions

Legacy Version: For existing merchants using the old integration. Not recommended for new stores.

Enhanced Version: Optimized and faster. Recommended for all new Shopify Plus merchants.

You're All Set!

Your Shopify Plus checkout now supports Google-powered address autocomplete, giving your customers:

- Faster address entry.
- More accurate shipping addresses.
- Fewer delivery issues and returns.
- A smoother checkout experience.
